

LOTS EzyLink

Your complete MYOB accounting integration

Save time, save money, save effort. Simplify administrative tasks using LOTS EzyLink.

LOTS EzyLink is an automated program that extracts daily sales and invoice data from LOTS and imports it into MYOB - at the click of a button. One mouse click and around 20 seconds is all it will take to complete your daily accounting. The data is checked and imported automatically into your accounting software. Sales, GST, debtors, EFTPOS, payouts, supplier bills, credit cards, takings... it even transfers the deposits into the correct bank account.

Credit Card reconciliation will be a breeze. Combine EzyLink with Integrated EFTPOS and avoid costly data entry errors forever. Bank reconciliations are done in a fraction of the time it normally takes. Entries in MYOB match your bank statement making the process quick and easy.

No more tax time headaches or additional accountants fees... everything is entered correctly as-you-go. Simply produce the relevant reports and the job is done. BAS will be done quickly and easily - no more last minute rushing making sure everything is entered - it has all been done for you!

Customers are already realising the considerable benefits accounting integration can bring to their business:

Benefits

- For less than \$5 a day you too can save precious working hours
- One mouse click and 20 seconds is all the time it will take to do your daily accounting
- Everything is posted to the right account, with the right amount, and in balance
- Supplier invoices processed automatically as bills ready for payment
- Easier bank reconciliations, BAS submissions, and annual tax returns
- Combine with LOTS Complete & have your entire stores account activity captured at the click of a button
