Accounting Integration Specialists

Look at what these existing users are saying!

"The amount of time it saves is fantastic....."

Bruce, Graceville Foodworks

"It is so simple to use....."

Janet, Eatons Hill Foodworks

"I love that I only have to enter my invoices once - the time savings are massive....."

Alan, 5 Star Bradbury

"It takes the stress out of coming to work, especially on a Monday, knowing that with one button press all the trading information will be correctly entered into MYOB"

Marion & Jill, Tugun Fruit Market.

"Should anyone ask for a reference, please send them our way. If asked we would rate your business 11 out of 10"

Chris, Imbil 4 Square.

"Smooth as silk....."

Andrew, Brandy Creek Café and Supermarket.

"You simply can't afford not to have this! In this age of technology, you would be crazy not to use it, the time savings are enormous....."

Paul, Warialda Foodworks.

Why not join these existing users and start to enjoy the considerable benefits accounting integration can bring to your business.

The solution to your bookkeeping blues!

SAVE TIME.

The data is checked and imported automatically into your accounting programme. Everything posted to the correct account, in the correct amount, and everything in balance. Sales, GST, Debtors, EFTPOS, Payouts, Supplier Bills, Credit Cards, Takings. It even transfers the deposits into the correct bank account. Credit Card reconciliation is a breeze. Make a couple of entries from your monthly statement and all entries made automatically. All in just a few seconds.....

SAVE EFFORT.

Bank Reconciliations are done in a fraction of the time it normally takes. Entries in your Accounting Programme match your bank Statement, making the process quick and easy.

SAVE MONEY.

No more tax time headaches, or additional Accountants fees because everything is entered correctly as-you-go. Simply produce the relevant reports and the job is done. Your BAS done quickly and easily, no more last minute rushing making sure everything is entered. It has all been done for you.

A message from David Hagen Managing Director of SSA

"Scanning Systems Australia Pty Ltd are proud to announce the release of a new set of features for PROFIT TRACK users.

EzyLink now automatically transfers all accounting information directly from PROFIT TRACK into MYOB or QuickBooks. For the first time all the trading information can be put directly into the accounting programme at the push of a button.

EzyLink accounting integration conforms to strict accounting principles and as such, sets new standards for the Point Of Sale industry. EzyLink offers a total business solution by providing seamless integration between PROFIT TRACK and the two most popular accounting packages available in Australia.

As part of the end of day procedures, EzyLink will pass the trading data to the new accounting interface, which seamlessly posts your data into either MYOB or QuickBooks in the blink of an eye.

OzBiz Solutions has worked closely with SSA to develop this advanced interface. The team at OzBiz specialize in providing accounting integration for major corporate accounts as well as independent retailers. We are delighted to endorse EzyLink as an interface that will enhance the performance of PROFIT TRACK for all our users."

"I recommend that you take advantage of the many benefits this new accounting integration module offers."
